Subject: FW: PFAS mtg at 4pm
Attachments: Clarke PFAS.docx

The PFAS data seems to be a different issue than the review of the storage stability/corrosion data requirements, which appears to be acceptable, since we are not requiring for other products.

I agree we need to be able to answer the question of whether the new container leaches PFAS, so having BEAD look at the test results makes sense.

If BEAD is comfortable with the information, will the team still need to Erofins information?

Subject: RE: PFAS mtg at 4pm

Please see attached that hopefully explains where things currently stand with regards to Clarke's proposed new container types

Kerry, can you provide clarification on this? It sounds like there is concern that CITAB is asking for additional info on methods for the storage stability data, but this might just be getting lost in translation. Feel free to schedule a brief meeting with us if that will be easiest.

Best,
Catherine

Thanks. I was not at the PFAS meeting yesterday for the same reason.

My understanding is that the team is also asking for additional information from Clarke but they may have an issue with it.

Marietta was going to follow up.

Thanks, Kerry! I think there may be some confusion around the second point so looping in Mike for awareness. (Though if he was at the meeting, it may already be resolved.)

Two items from the meeting of RD interest:

- Mike Goodis is scheduled to meet with OECA and Clarke today regarding Clarke's take back/disposal plan.
- The Clarke submissions for the new container types are being reviewed by CITAB. CITAB has asked BEAD/ACB to review the analytical method for PFAS detection submitted by Clarke in support of the CITAB review of the Clarke submissions and has agreed to get a report back to CITAB by the end of this week.

Hi Kerry,

Are you able to cover the 4pm PFAS mtg for RD? We have a Seresto meeting at the same time.

Best,

Catherine
